Harvest Needs

Harvest is almost upon us. You will need the very best of groceries. Our large turnover enables us to buy to best advantage and to keep our stock always fresh.

Let us figure on your next grocery bill.

We have just unloaded another car of

"Robin Hood"

It might interest you to know that bread baked from Robin Hood flour, won 6 out of 7 prizes offered at the recent Calgary Exhibition.

Also all of the 11 prizes offered at the Edmonton Exhibition were won with bread baked from Robin Hood flour. So it must be good!

Order a sack with your next order.

Preserving Fruit season will soon be in full swing. Let us know your requirements.

S. A. Miller

Granaries, New Buildings or Additions

The policy of many thousand lumber yards in the Prairie Provinces, is to line up as far as possible, their fall business, and order from the mills accordingly. This is necessary to avoid carrying unduly large stocks. As it takes from two to three months to get these orders filled, it will be readily seen that the yards which order "light", may not be in a position to fill orders for customers who do not plan ahead.

Plan your building program now and get material while our stocks are complete.

Mustard is valuable in the diet but it must be Keen's

Did you know that mustard not only gives more flavor to meats, but also stimulates your digestion? Because it aids assimilation it adds nourishment to foods.

A Hint To Our Towns

Townpeople, say a Western farm paper, are notoriously ready to give advice to the farmers, and, it asks, why should not the farmer who takes pride in his farm and his home give a little good advice to his green and garage man and lumber dealer and hardware merchant. It thereupon proceeds, on behalf of its farmer subscribers, to tell the townspeople some home truths.

Trees and flowers, beautiful homes, with attractive surroundings, are, says this paper, to be found in practically every farming district in the West, but the towns and villages are lagging far behind and most of them are becoming retrograde with the years. "Townspeople, say the farm paper, unattractive shacks in many cases to begin with, ramshackle outbuildings and sheds, down-at-the-heels fences and weeds, neglected gardens—how many of the country towns in the West answer this description?"

The word picture sketched by this farm paper is by no means overdrawn. While the cities, and farmers by the thousands, have gone in extensively for the planting of trees and the beautifying of the surroundings in which the people pass their lives, very few towns and villages have made any effort to make them as attractive. Most of them present the appearance of a group of equatorial huts, occupied by transients, having no intention of remaining permanently and establishing real homes, but expecting to move on. They give the impression of "boom" and of waning towns where anything is good enough for the time being until the boom bursts and the town dies.

Country roads are frequently better than these town and village streets with their gutters overflowing with mud and weeds, and with backyards and lanes common dumping grounds for refuse and junk of all kinds. In such surroundings it is little wonder that very soon some windows remain uncleaned and in a generally unclean, untidy, dirty condition. A city store which presented the same untidy appearance would drive away rather than invite trade.

Yet many towns and village merchants wonder why people pass their doors to trade elsewhere. Complaint is also voiced because of the difficulty of obtaining and retaining the services of qualified help in these smaller communities. But why should any self-respecting, ambitious young man or woman settle down to spend their lives in a town or village where the people lack even sufficient enterprise to paint their buildings, tidy up their premises, and convert their half-pride struts into avenues of trees, and their private grounds into flower and neat vegetable gardens?

Speaking for the farmers, the paper already quoted says: "A clean, bright, cheerful town certainly makes a better bid for business than a shabby and ugly one, and when everybody has a car the progressive town will draw the trade." Absolutely right! Shakespeare said, "The apparel oft proclaims to the world the personage within." A shabby, untidy, neglected-looking collection of buildings is not apt to impress a prospective buyer or even a passer-by as being the home of up-to-date merchants where good value for his money can be obtained.

Western towns and villages should also appreciate the fact that the motor car and the rapid extension of systems of good roads is working a revolution in the country trade and a lucrative trade it is. Motor tourists arriving at a neglected looking town quickly pass by, but a town of neat, nicely painted buildings, well tended streets, trimly kept gardens, and an attractive life in its square or park, invites a stop. It is in such towns tourists stop for the night and make their purchases, and it is in such towns that they would like to travel.

Travelling across the country, either by train or motor, how often is the remark heard: "I'd hate to live in a town like that." On the other hand, when one of our all-time illustrations of a luxurious town road, people are heard to comment on its attractiveness and to say: "Now there is a place I would like to live in."

Probably the reason why nothing is done to improve the appearance of most places is that the experience has demonstrated over and over again that the cost of painting trees, of laying out a small park, of keeping the town is comparatively small, while the resulting benefits are large, yielding big dividends on the investment, for, after all, these things are practical, dividend-paying investments just as truly as is the provision of fire-fighting equipment. And if the community as a whole improves the appearance of the streets and parks up, such action becomes infectious and very quickly individual citizens put their private grounds and buildings into shape.

Certainly there is a grand opportunity open to a few public-spirited men and women in most of our Western towns and villages to render real community service by inaugurating Town Beautiful campaigns.

A railroad official unloaded a car of steers in Oklahoma and watered them. Then he found there wasn't room enough for them in the car car.

Short faces with eyes far apart are said to be characteristic of people with musical talent.

English Teachers Visit Canada

His Majesty Conveys Message to Departing Pedagogues
The party of 100 school teachers from Britain who are visiting Canada, received the following message from His Majesty the King before their departure:

"His Majesty congratulates the lesson upon the happy conception of the undertaking which will give opportunities to study the educational system in Canada and to gain an insight into her history, development and general resources. The King feels sure that the results of this experience will be fraught with good and far-reaching effects, not only on the teachers themselves but also on those who will in the future come under their influence and instruction and upon the relations between the Motherland and the great Dominion."

"From his recollection of Canada and her warm-hearted people, His Majesty can assure the teachers of the very best welcome which they will receive and wishes them God-speed and an enjoyable stay in that vast and beautiful country."

The message was received with enthusiasm by the teachers aboard the Empress of Scotland, on which they sailed for Canada.

Subdues Sore Throat In a Short Time

When a severe cold grips your throat, when it makes you gag and cough, when it is a real nuisance, apply good old "Nervine." This wonderful liniment sinks right in, penetrates to the very core of the affected region. You get a truly wonderful relief. It soothes the throat, tightens the chest and bad colds melting away like snow. It is the same as the famous "Nervine." Five times as strong as other liniments, full of pain-killers, it will subdue any throat in five minutes. Get a 50c bottle today.

Fastest Mail In the World

Chicago-New York Night Air Mail Gives Wonderful Service

To Chicago and back in forty-two hours, which is exactly what the night air mail means to correspondents between the two cities, is hailed by Lester D. Gardner, editor of *Asiatic*, a complimentary testimonial to Postmaster General Now as "the fastest mail service in the world." Actually the letter which Mr. Gardner started for Chicago at 7 p.m. Wednesday and received on its return at eleven a.m. Friday was in the air only sixteen hours of the total elapsed time. So it is possible to bring about, ultimately, when the service is expanded to day and night both, actual intercommunication over the hundreds of intervening miles within a single day.—New York Telegram.

Miller's Fern Powders are a pleasant medicine for worm-infested children, and they will take it without objection. When directions are followed, it will not hurt a child, and a healthy child, as there is nothing of an injurious nature in its composition. They will not hurt a child of worms, and restore the health of the little sufferer. It is a healthy and safe remedy for the attacks of these internal pests.

Homestead Entries
Decline in homestead entries as the settlement of the west proceeds is interesting to contemplate. In 1905-06 and 1910-11, the two largest years in history, Saskatchewan accommodated 27,692 and 25,221 homesteaders respectively. In 1921, 2,729 homesteaders filed on Saskatchewan lands.

Mother's Value This Oil—Mothers who know how mildly potent may soothe their children and how necessary prompt action is in applying relief, always keep at hand a supply of Dr. Williams' Kidney Oil, because experience has taught them that this is an excellent preparation for the cure of this ailment. And they are wise, for its various uses render it a valuable medicine.

SUNDAY SCHOOL LESSON

AUGUST 9

BEGINNING THE SECOND MIS-
SIONARY TOUR

Golden Text:
He shall have dominion also from sea to sea,
And from the River unto the ends of the earth.
Psalm 72:8

Lessons: Acts 15:36 to 16:5.
Devotional Reading: Psalm 67.

The Text Explained and Illumined
The second missionary journey planned, verses 24—"After some days," an indefinite expression denoting a considerable lapse of time—Paul suggested to Barnabas that they revisit the churches founded on their previous journey and see how they were faring.

"He would visit them that he might acquaint himself with their case, and inquire unto them such spiritual gifts as were bestowed to him as the physician visits his recovering patients that he may perceive what is proper for the perfecting of his cure, and the preventing of a relapse" (Matthew Henry). On that previous journey they had suffered much. They had been expelled from Antioch of Pisidia, they had been driven from Iconium with threats of stoning, and at Lystra Paul had been stoned and left for dead outside the city. Now Paul proposes retracing the same route.

"Give us the courage that prevails. The steady faith that conquers." (Van Dyke).

Vancouver A Busy Port

Remarkable Strides Made in the Past Five Years

Porter—Two regular steamship lines are now operating out of the port of Vancouver, the gross tonnage for last year being 1,172,514 tons. The total tonnage in excess of the 1921 figures. Remarkable strides have been made by the port during the past five years. Vancouver is now one of the leading ports on the Pacific.

NEW HEALTH FOR SUFFERING WOMEN

Aching Backs and Tired Limbs

Need Not Be Endured
Two many women endure suffering that is a shadow over half her existence. An aching back, tired limbs, attacks of faintness, splitting headache, nervousness, and all the other ailments which result from a weak blood. Such trials indicate plainly that the blood is thin and watery and that the system needs the aid of a real tonic such as Dr. Williams' Pink Pills. These pills are the best medicine for a weak blood. They are the best medicine for a weak blood. They are the best medicine for a weak blood.

I was so weak for months that I could not walk across the room without a feeling of faintness. I had scarcely strength enough to stand up. I was so weak for months that I could not walk across the room without a feeling of faintness. I had scarcely strength enough to stand up. I was so weak for months that I could not walk across the room without a feeling of faintness. I had scarcely strength enough to stand up.

RETAILERS WOULD TAX MAIL ORDER BUSINESS IN WEST

Vancouver—Resolutions condemning the stamp tax on receipts and receipts, protesting against the extra charge made by some manufacturers and wholesalers for boxes and cartons, recommending a tax on mail order business which would be distributed among municipalities concerned, and amending the constitution, were passed by the convention of the Retail Merchants' Association of Canada held here.

Spilt discussions took place on the question of income tax and on the egg grading regulations. The question of the income tax was brought up by the Quebec delegation, who pleaded for the association to take a stand against the tax. It was, however, referred to the next meeting, which will take action after a survey of the wishes of the provincial boards and individual members.

Alberta delegates proposed a resolution to request the government to allow country dealers to buy and sell unshelled eggs under conditions that they would grade all eggs for resale. The special committee which has been appointed to deal with this resolution recommended against it. After discussion, the matter was referred back to the committee and will be brought up again.

Rifians Prepare To Attack Holy City

Leader of Rebellion Getting Ready to Play Last Card

Pez, French Moroccan—Abd-el-Krim, directing the plans of a rebellion in Rifian Morocco, is getting ready, according to latest indications, to play his last card in the shape of a drive on the holy city of Mecca, 1,500 miles northwest of his objective, Pez. The French command, however, is doing everything necessary to deal with the expected drive, speeding reinforcements to vital points, posting heavy artillery around Ouezzan, concentrating squadrons of tanks and armored cars in centres from which they can be dispatched rapidly wherever they are needed.

Prolonged French artillery fire and bombing airplanes have kept the rebels from establishing at the foot of Mt. Acha, but the situation there is still critical, owing to the fatigue of the garrison and its insufficient water supply.

May Develop Zinc Industry

U. S. Main Deposit Trying to Discover

Township—Prospects are bright for the development of a great new industry in northern Ontario. If the efforts of a big United States syndicate to develop the main zinc deposit, believed to exist in the Sudbury nickel district are successful, according to information secured at the recent meeting of the Discovery of hitherto unsuspected deposits of zinc of good quality in the Sudbury nickel district came to a group of prospectors who are pursuing the hunt for coal in northern Ontario.

Prepares For Prince's Visit

Buenos Aires—The senate has voted an appropriation of 400,000 pesos (about \$100,000) to entertain the Prince of Wales during his coming visit to Argentina. British subjects in Argentina are preparing numerous festivities in honor of the Prince. His picture is making its appearance everywhere.

"Buy in Canada" Movement

Montreal—Unquestioned support for a "buy in Canada" movement will be extended from coast to coast, was voiced at a representative meeting of bankers, brokers, bond dealers and transportation companies. Advertisers and other producers and consumers will be approached to lend their aid.

First Drive in Far North

Edmonton—His Honor Judge Duggan, acting as stipendiary magistrate for the Northwest Territories, who returned to the city July 28 from Fort Smith, has granted the first divorce ever given in the Far North.

Spy Gets Twelve Years

Cologne—Heinrich Stieglitz, formerly employed by the Krupp and charged with selling plans of big guns to foreign powers during the war, has been sentenced to prison for 12 years.

In a thunderstorm at Almaty, Altai, recently, lightning struck an altar in a church without damaging it.

Welcome Mount Logan Climbers

Conquerors of Canada's Highest Peak Return to Vancouver

Vancouver—Brought by the glare of the ice peaks of Mount Logan and led as preachers from the hardships of their successful ascent of Canada's most formidable peak, Captain A. H. McArthur, of Wilbur, B.C. leader of the expedition, and Col. W. W. W. Lamb, D.S.O., of Vancouver, H. P. Lamb, of Ottawa, and Henry Hall, Jr., of Boston, returned to Vancouver by boat from Victoria. They received from their friends and admirers a memorable welcome.

Except for Mr. Lambert, none of the mountaineers displays any physical evidences of hardships. Mr. Lambert, who was the first to reach the summit, is still in the best of health, and his feet still encased in moccasins. He is still under treatment.

Col. Foster, the local member of the expedition, declared "there is nothing more to be said about our trip than what has been already said."

Declares Wheat Pool Success

Could Not Expect More For First Year Says Hon. Doherty

Ottawa—The Saskatchewan Wheat Pool met with all the success it could reasonably expect for its first year of operation, stated Hon. Manning W. Doherty, M.L.A., and Minister of Agriculture, former minister of agriculture in the Duffin Government who assisted in the organization of the pool here two years ago and who was in town for the big rally of the Saskatchewan Wheat Producers' Association at the Sun building in this city.

"The salvation of agriculture," declared Mr. Doherty, "depends on the successful operation and development of community marketing and associations of producers."

Dealing with the prospects of the pool, Mr. Doherty, former Ontario minister said that the pool of the east were rejoicing in the reports coming through to the effect that the success of the crops now was practically assured.

Refunding Of Loans

Government Must Finance to Extent of \$155,000,000 This Year

Ottawa—Hon. James A. Robb, acting minister of finance, who recently returned from a holiday, is turning his attention to the financing of loans maturing during the latter part of the year. Planning to the extent of \$155,000,000 will be necessary this year, as estimated on today's basis, the first maturing obligation, amounting to five million pounds sterling, on August 15, will be met with cash. On the 15th of the following month, treasury bills to the amount of \$900,000,000, payable in ten years, fall due on December 1. The amount is \$15,015,000.

Mr. Robb has gone to Toronto, and his attention will be directed to the question of refunding some of these loans with financial views.

More Farmers For Alberta

One Hundred Young Britishers Coming Over This Fall

Edmonton, Alta.—Hankins Amery, counsel for the overseas settlement board, and himself a member of the board, passed through Edmonton on his way to the coast and thence to Australia, and between trains, Hon. Geo. Howley talked over with him the chances for further British immigration to Alberta this year.

There will be 100 more young Britishers coming over this fall, said Mr. Amery, and applications are now being received at the board's office in London.

Four Vacancies to Fill

Ottawa—The resignation of Hon. J. B. M. Baxter, a member of Saint John, succeeded by his becoming leader of the New Brunswick Conservative party, creates the fourth vacancy in the House of Commons. The other seats vacant are Compton, Quebec, held by a Liberal; Egan, Ontario, a Conservative; and West Middlesex, by a Progressive. If there is not a general election following a conference of system officials with Sir Henry Thornton, who stated that plans will be developed immediately for the election of the new men.

Rebuild Minaki Inn

Winnipeg—Minaki Inn, one of the Canadian National Railways' summer hotels, which was destroyed by fire last month, will be rebuilt on the bungalow style, similar to Jasper Park Lodge. Announcement to this effect was made following a conference of system officials with Sir Henry Thornton, who stated that plans will be developed immediately for the election of the new men.

Federal Election Speculation

No Announcement Is Expected For Some Days Yet

Ottawa—It is now stated here on good authority that there will be no more meetings of cabinet until after the New Brunswick election on August 10. In that case it is improbable that there will be any announcement in regard to the holding of an election this autumn, for a couple of weeks. It has been taken for granted that the government will wait the New Brunswick result before deciding whether or not to go to the country this autumn. If it should prove favorable to the government now in power, it will be a factor in determining the federal premier to make his appeal. If it should be unfavorable, it will be an added argument for the ones who are counselling delay. For the present, awaiting the question of holding an election before the elections must remain unchanged.

British Naval Program Has Passed House

More Blinder Twine Will Be Necessary For Heavy Straw

Winnipeg—It will cost Canadian farmers one-fourth more to harvest their crops this year as compared with normal seasons. The differences will be accounted for by the proportionally heavy straw. This applies to the twenty million acres of wheat as well as ten million of oats and three million acres of barley, rye and flax. It will be paid out to 60,000 harvesters and binder twine manufacturers but the difference in freight rates over other years will favor the producer by some five to six cents per bushel, more than enough to offset the loss in the cost of direction.

Official and unofficial estimates of total yield from half a billion of wheat to three hundred and fifty million bushels. There, moisture, rail and paraffin must be reckoned with, but the general harvest is almost in sight. Those who must buy grain are inclined to over-estimate the yield and the producer and his organization are inclined to under-estimate it. This is the history of the grain industry and is not confined to western Canada.

Press Delegates Have Left For Australia

Old Country Party Will Return Through Suez Canal

More than 50 delegates from Canada and the United States are expected to attend the Imperial Press Conference in Melbourne, September 29 and 30, embarked here on the liner Ararat for Australia, July 28. The Old Country party, headed by Viscount and Viscountess Burmah, plans to return through the Suez Canal, thus completing a voyage around the world. It will be nearly Christmas when the majority of the party reach England. The date from Freemantle is November 3. The Canadian party, for the most part, will return by way of Vancouver in October.

Japanese Alpinists Climb at Jasper

Includes still and motion picture cameras and a complete dark room with which pictures will be developed in the field. Three Swiss guides, Heinrich Palmer, Hans Kohler and Jean Weber, from Jasper Park Lodge, are accompanying the party and five guides and forty horses from the outfitting stables of Fred Brewster, are being used on the trip. This is the largest party which has left the lodge this year, and the first party of Japanese Alpinists to tackle some of the untried fields of the Canadian Rockies.

The party is shown ready for the start from the Brewster ranch to right—N. Okabe, M. Itano, Y. Mita, S. Hashimoto, Y. Maki, Fred Brewster, guide; H. Maki, Fred Brewster, guide; H. Maki, Fred Brewster, guide.

PROPOSAL TO TAX RAILWAYS ON A MILEAGE BASIS

Winipeg—Suggesting that the Manitoba Government consider adoption of a policy of taxing railways on a mileage basis instead of gross earnings, Sir Henry Thornton, president of the Canadian National Railways, Major O. M. Bell, deputy minister of railways, and M. Gardiner, member of the Canadian National board, conferred with Premier Bracken here.

Premier Bracken believes the proposed scheme inequitable on the ground that Manitoba, with small mileage and big business, would suffer the expense of the province where mileage is great and business small. The railway officials, it was stated, plan to submit the proposal to other provincial governments on their trip west, and confer with Premier Bracken on their return journey.

Cost More To Harvest Crop

More Blinder Twine Will Be Necessary For Heavy Straw

Winnipeg—It will cost Canadian farmers one-fourth more to harvest their crops this year as compared with normal seasons. The differences will be accounted for by the proportionally heavy straw. This applies to the twenty million acres of wheat as well as ten million of oats and three million acres of barley, rye and flax. It will be paid out to 60,000 harvesters and binder twine manufacturers but the difference in freight rates over other years will favor the producer by some five to six cents per bushel, more than enough to offset the loss in the cost of direction.

Official and unofficial estimates of total yield from half a billion of wheat to three hundred and fifty million bushels. There, moisture, rail and paraffin must be reckoned with, but the general harvest is almost in sight. Those who must buy grain are inclined to over-estimate the yield and the producer and his organization are inclined to under-estimate it. This is the history of the grain industry and is not confined to western Canada.

Earl Haig Sails For England

Mission to Canada Took Him Through Good Part of Dominion

Montreal—Field Marshal Earl Haig and Countess Haig sailed for England and France here July 31 aboard the Lestia. A guard of honor and a military band accompanied the distinguished visitors from the home of Sir Henry Thornton, where they stayed during their visit in Montreal, to the liner. The route enabled the Earl and Countess to pay their respects to the great soldier, whose mission to Canada, that of acquainting the various war-experience men's organizations into one body, took him through a good part of the Dominion.

Invents New War Weapon

San Francisco, Cal.—Demonstration of a destructive force which he has invented will be carried out on a United States battleship off the coast of California, Dr. Edward H. Scott, of Detroit, has announced.

Dr. Scott, who is said to have sold the French Government the "killifish" machine, will demonstrate the weapon, which he calls his new machine the "death stroke." He claims it will kill life which come into contact with within a radius of 20 miles. The naval demonstration will take place within two months, the Detroit inventor said.

Not Coming To States

Duke of York Is Not Expected Next Year

London—It is understood that while the Duke of York's younger brother, the Prince of Wales, has accepted the honorary presidency of the Empire of Prewidat at York, he is not expected to go to York next year as New York dispatches have stated he would do. However, it was announced in New York that the World Forum expected the Duke to visit York next year. The purpose of the forum is to restore and perpetuate the Yorktown battlefields, where the British commander, Lord Cornwallis, surrendered to the armies fighting for American independence in October, 1781.

Treaty Relating To China Will Now Be Ratified

Washington—Arrangements are being made at the department of state for the formal exchange of ratification of the nine-power treaty relating to China, which was signed at the time of the Washington arms conference.

Notification has been received that the necessary documents from Paris to the French action in ratifying the treaty would reach Washington within the next few days. Ratification was the last of the nine powers to ratify.

The treaty is that providing for a commission to revise Chinese customs, provide the Chinese Cabinet Government with a five per cent. ad valorem duty on imports. The assembling of this commission is looked to as the first essential step in stabilizing conditions in China, in order to insure adequate protection of foreigners.

New Grain Act

Revised Act With New Regulations Has Come Into Operation

Ottawa—The Canada Grain Act as revised at the last session of parliament became effective August 1.

The order-in-council authorizing the revision of the new regulations has been passed and the official proclamation will be made in The Canada Gazette this week.

The new Grain Act was one of the most important measures before parliament last session and a special commission of several weeks to its consideration. The amendments to the old act were chiefly respecting the operation of elevators, the weighing and grading of grain. All terminal elevators under the present act can be put under the control of a commission of the government, on orders, though such action is regarded as unlikely.

Annual Golden Rule Dinner

Paris—Edmond Herriot, former French premier, has accepted the invitation of the Near East Relief to its annual golden rule dinner in New York, Sept. 29, according to an announcement by the organization.

Herriot has been closely connected with the organization's work for several years and for two years has been chairman of the French observance of Golden Rule Sunday.

SAYS TOLERANCE IS THE NEED OF CANADA TO-DAY

Montreal—The A. B. C. of Canada today are less politics and more economics, an amalgamation of the needs, central and western view, and a Canadian policy that will lead to a development of its industries and the obliteration of all differences between the races and religions existing in this country. This summary is the keynote here with Lieutenant Governor Harry Cockburn of Ontario, president of the Cockburn Play Company, and a director of the Canadian Pacific Railway.

"The lesson of tolerance is one of the great things that Canada must learn," said the governor. "At present we have an eastern Canadian policy and a western Canadian policy, and to some extent a central Canadian policy. Canada has a brilliant future before it which cannot be stopped, but which must be greatly retarded if we do not first learn the lesson of tolerance and co-operation. We must learn to concede to others that they have a right to their own opinions. Then, each must give and take until we have formulated a true Canadian policy."

Canada is suffering from growing pains as a result of over-expansion, he said. "The remedy is for its pleasure seeking people to settle down to the practice of industry and thrift."

Governor Cockburn expressed the belief that continued efforts of western Canada would bring about the chronic seasonal unemployment which now exists in certain parts of south America. Industry and development in western Canada is not only very practicable, but urgently desirable, for no other reason than to make its inhabitants a wage earning the year round, he said.

Increase In Passport Issues

Unusual Number of Canadians Are Going Abroad This Year

Ottawa—Canadians are travelling more this summer to a greater extent than usual, judging by the number of passports issued. The heavy passport issue has been reported since March, April and May, although the exact number has not been reported.

At British subjects coming to Canada do not require passports, repeated efforts have been made to secure the passport law. The passport law, when going only to the British Isles, the Imperial Government, however, takes the stand that identification of all persons leaving the country is necessary, and that no method is less troublesome in the long run than the passport.

Alberta Rates Case

S. B. Woods, K.C., to Represent Province Before Railway Commission

Edmonton, Alta.—S. B. Woods, K.C., of Edmonton, has been appointed by the Alberta Government as provincial freight rates counsel, and will represent the province before the railway commission when it holds its investigation into the freight rates question. He will take the Alberta side of the case only, and will not be associated with any other argument before the commission.

Two objectives, in particular, will be sought in connection with this province's effort to get better rates, according to Province of Alberta. These are to be a through rate on coal and grain westward on the same basis as the Coast West tariff. The movement of coal will be emphasized as a matter of national importance, and the commission will be asked to establish a reasonable rate that will make it commercially possible.

MacMillan Party "All Well"

Washington—The expedition headed by MacMillan, which sailed from Seattle, has been reported as all well.

Germany Paying U.S.

London—Germany has paid almost \$1,000,000,000 of her war bill, according to a treasury announcement in Berlin. The bill is being paid in merchandise and cash, distributed by the reparations commission to the end of June, amounted to approximately \$800,000,000.

WORLD HAPPENINGS
BRIEFLY TOLD

The Rockefeller Institute of New York has donated \$100,000 for the erection of an institute of physical chemistry in Madrid, Spain.

An anti-luxury society has been formed at Tokyo by the wealthy Japanese to induce the wealthy people of Japan to discontinue habits of luxury.

Consummation of the European security pact, in the opinion of President Coolidge, would lay a broad foundation for further disarmament.

According to the city directory just issued for this year, the population of the Greater Vancouver area is figured out at more than 250,000.

A giant meteorite in Colorado is to be explored for its platinum content. Small quantities of radium regularly were isolated from a meteorite.

No further announcement of the cancer work will be made by James E. Barnett and Dr. W. W. Croft until autumn. This is stated in London on authority.

Mrs. O. L. McCracken, wife of a ranchman at Helena, Montana, has paid all her daughter's school bills by carving attractive dolls out of the roots of cottonwood trees.

Monday, October 26, is the tentative date for the opening of the 1925 season of the Ontario Agricultural Exhibition. It is reported that the 1925 season started November 5.

The City of Hull, England, at its weekly city week meeting, decided to adopt some of the ideas of the demolition and colonies within the empire toward which it could concentrate on overseas activities, including emigration.

As the result of a lawsuit which has been proceeding for 20 years, the standing timber on a great stretch of forest formerly claimed by the Schoenborn family of Velke Lucky, Bohemia, is to be sold by the benefit of the Bohemian peasants of the district.

Hon. Charles Stewart, minister of the Interior, Hon. R. Dandurand, government leader in the Senate, and Hon. P. C. Larkin, Canadian commissioner in London, will be Canada's representatives at the meeting of the assembly of the League of Nations in Geneva in September.

North Faces Food Shortage

Sinking of Supply Ship Means Hardship for Trading Posts
The sinking of the Hudson's Bay Company's supply ship Baykema in Ungava Bay, July 23, may result in a shortage of supplies at some of the far northern posts on the Labrador and Ungava Bay coasts, and the isolated trading stations in Hudson's and James Bays.

S.S. Nascopie, which rescued the passengers and crew of the Baykema from the barren coast near Port Huron, has been ordered to make in the Arctic Ocean around Baffin Island, the farthest north, and the Baykema's last, possible, en route to the Nascopie from completing her round. The latter is now racing around the coast, delivering supplies to the trading posts, and is scheduled to return to the coast.

Meantime, the crew and passengers of the Baykema are about the Nascopie and the full story of the wreck will not be told until some of them return to civilization. When the Nascopie's journey is done, whether storm, ice pressure or a treacherous reef caused the sinking is not revealed in the messages from the Nascopie.

Among the residents of the far north who depend for necessities on the supply ships sent out by the Hudson's Bay Company are farmers, traders, postmen, hunters, fishermen, missionaries and many of the Eskimos themselves.

Many Radio Fans

Radio Receiving Licences in Canada Are Over 50,000

The number of radio receiving licenses held in Canada at the end of June totaled 56,662. It was learned at the radio branch of the department of marine and fisheries.

Licenses issued to citizens of western provinces were as follows: British Columbia, 3,392; Alberta, 5,041; Yukon, 22; and North West Territories, 5.

World Policy Congress

Canada will entertain the International Association of Intellectuals and Investigators of Public Husbandry during the early summer of 1925, according to a statement issued by the federal department of agriculture. Last year this association in Spain, and the Canadian exhibit of poultry there attracted much attention.

W. N. W. 1925

Cost Of World War

League of Nations Issue Official Figures For All Combattants

After several years work, the League of Nations has issued the first complete assessment of the material losses of the world war officially compiled from all the nations that fought.

Here is the net result of the sheet given eleven years ago by a gay Austrian officer:

3,595,771 known dead.
2,591,800 presumed dead.
6,295,512 seriously wounded.
14,002,093 otherwise wounded.

\$114,333,637,097 direct cost of the war.
\$29,560,000 property loss of the war.
\$23,551,576,520 capitalized value of loss of life.

In assessing the capitalized value of life, the league figures the value of a human life for war purposes at \$4,720 for Americans, \$4,140 for British, \$2,900 for French.

Powerful Radio Station

Programmes To Be Broadcast From Centre of England

The world's most powerful broadcasting station, which will provide British radio programmes for American listeners, will be located at Daventry, as near as possible to the exact geographical centre of England. The station announced itself as EXX, operating on a 2,000 metre wave length, in its inaugural programme, which was headed by the Master-General Mitchell Thompson.

Using 25 kilowatts power, EXX will broadcast from two triangular steel masts 800 feet apart and each 50 feet high, which will support a T-type sausage aerial. With this equipment it is expected to reach listeners outside the range of amateur broadcasting stations, and to send British dance music, songs and what not to the far corners of the world.

Preserve Ancestral Estate

Late Marcus Curzon Was Interested in Survival of Landed Aristocracy
Because he attached "high value to the survival of the landed aristocracy of Great Britain," the late Marcus Curzon of Kedleston, established in his will a "Kedleston trust" to preserve his ancestral estate for his personal use and the use of his family.

After explaining it was not personal vanity but a hope for the continuation of the English nobility and gentry, Lord Curzon said:

"I desire that my family, which has owned and resided at Kedleston for more than 800 years, shall continue to live there and to maintain the traditions of a not unworthy past." He expressed hope that future owners of Kedleston would "equally acknowledge this obligation."

Saskatchewan Clays

New Company Incorporated to Manufacture Clay Products
Manufacturers of white stoneware, wall tile, floor tile, sanitary ware, terra cotta, dinnerware and hotel ware, are to be established in the province, which is expected to be undertaken by the International Clay Products, Limited, a new company just incorporated at Regina.

A section of clay, located near Redfern and another 320 acres near Koolby, in the southwest of the province, which is acquired by the company, which is capitalized at \$100,000, of which \$50,000 preferred stock will be offered to the public shortly. The company has acquired the plant formerly operated by the Eastern Brick and Coal Company, including 200 acres of clay property.

Canada's Greatest Need

Immigration Believed To Be the Best Remedy for the Betterment of Canada
Immigration in Canada's greatest need at the present time and that this opinion is shared by thinking men, who have the welfare of the Dominion at heart, is evidenced in the fact that at the recent Kinsmen international congress, held in St. Paul, attended by some 5,000 business executives, delegates representing every town and city of importance in Canada, endorsed a resolution guaranteeing their earnest support in working out what they believe to be the best international immigration for the betterment of Canada.

Answer This

Jacob—Does my birthday come on Monday this year?
John—No, dear.
Jacob—And last year on Sunday?
Mother—Yes, dear.

John—Tough! On how many days in the week have I been born.

A Wizard

Kane—"Briggs must be an artist." Brewster—"How's that?" Kane—"He knows the names for all the colors of his wife's silk stockings."

ECLIPSE FASHIONS
By "Sally"

Little Girls' Attractive Frocks

Printed crepe and white washable silk join forces in making these two attractive frocks. Tabs buttoning from the right onto the left side of the panel, trim the collar, and cuffs on the short sleeves. Size 4, 6 and 8 years. Size 4 years requires 2 yards of 25-inch material. Price 25 cents. Our new Fashion Book contains many styles showing how to dress boys and girls. Simplicity is the rule for well-dressed children. Clothes of character and individuality for the smaller folk are hard to buy, but easy to make with our patterns. A small amount of care spent on good materials, cut on simple lines, will give little things the privilege of being lovely things. Prices of the book 10 cents the copy. Each copy includes one coupon good for five cents in the purchase of any pattern.

Universal Gloom In Russia

People Are Poor and Do Not Care What Happens
Gordon Selfridge, the London department store man, who has just returned from a tour of Soviet Russia, recording his impressions in the Weekly Dispatch, writes:

"I do not consider there is sufficient money in Russia to buy British goods. Nobody in Russia has money to spend. High paid Soviet officials receive a salary of only £20 a month, and goods of any value could find a market among an almost penniless people."

The Russians have reached a stage of universal gloom which is almost incomprehensible to the western mind. They are meticulously polite to strangers, and although everybody is very poor, nobody will accept a tip or even a waiter. I offered one to a train official, and with dignity he refused it. M. Livinoff told me it was Russian pride, and I cannot help admiring their will.

Russia, he said, is a "land where nobody cares what happens."

World's Longest Railway

Road Completed in Australia Is 5,423 Miles Long
The longest railway in the world is now complete by the recent laying of a connecting link, making a continuous line of track from Meekatharra, in west Australia, to Dajarra, in Queensland, a distance of 5,423 miles. The line from Halifax to Vancouver, Canada, via Canadian National Railways, is 3,781.5 miles, and, by way of the Canadian Pacific Railway, 5,423 miles. These two direct lines, however, the Australia distance is the result of a connecting up of two systems.

Reasonable
"You want a divorce from your husband?"
"Yes, I do."
"Incomprehensible! I want a divorce and he doesn't!"

Shortland is believed to have been practiced in ancient Phoenicia and possibly in Babylon.

Historic Sites Board Meets

Thirty-eight Sites Are Recommended For Marking As Being Of National Importance

The fourth annual meeting of the historic sites and monuments board of Canada was held recently in Ottawa when over one hundred and fifty sites were reviewed and thirty-eight of these of national importance. Brigadier E. A. Cruikshank, chairman, presided. The board is composed of representatives in attendance were, Dr. J. H. Coyne representing Ontario; Dr. J. C. Webster representing the Maritime Provinces; His Honor Judge P. W. Howay, representing western Canada; Mr. A. Patteux representing Quebec; Mr. J. B. Harkin, commissioner of Canadian national parks, representing the department of the interior; and Mr. A. A. Pinard, Canadian national parks, secretary. The historic sites and monuments board of Canada acts in an advisory capacity to the department of the interior in connection with the work of marking the historic sites of the Dominion.

Of the sites selected by the board at the 1925 session the most important include the following: Champlain's Landing, Alton Place, opposite Pembroke, Ont.; site of the first railway in Canada, at St. John's, N.B.; prairie, at LaPrairie, Que.; the Teanacosta Porcupine ruins, at Cabana, Que.; fugitive slave refuge, at Amherstburg, Ont.; inception of the construction of the Rideau Canal at Ottawa, Ont.; Port Qu'Appelle, Sask.; site of the battle of the Seven Oaks, in 1814, in the prairie, Man.; Port Steele, B.C., famous as a North West Mounted Police base; and the site of the first railway in Canada, at St. John's, N.B.

Approximately twenty sites are marked each year by the Dominion Government, and among the most important dealt with in 1924 were the following: Legislative Building, Charlottetown, P.E.I.; Port Edward, Charlottetown, P.E.I.; the site of the first railway in Canada, at St. John's, N.B.; the site of the first railway in Canada, at St. John's, N.B.; the site of the first railway in Canada, at St. John's, N.B.

Hungarians Hold Celebration

Mark Twenty-fifth Birthday of Settlement of Hungarians in Saskatchewan
The little Hungarian settlement of Bekevald, Sask., celebrated its twenty-fifth anniversary July 25, when Hon. W. H. Newlands, lieutenant-governor of Saskatchewan, accompanied by the Hungarian consul-general, Armand de Szabo, visited the township and welcomed by the mayor and a delegation of officials.

Lieutenant-governor Newlands, addressing the gathering, spoke highly of the Hungarian settlers and congratulated them on their success. He hoped many more of their countrymen would take advantage of the unlimited opportunities awaiting them in the west of Canada.

The town of the settlement was Szabo Janos, now known as John Szabo, who came to Bekevald 25 years ago. He has been a successful farmer and his early efforts to overcome difficulties and to found what is now a thriving community of some 1,500.

Hermit Amazed At Progress Of World

Declaring that naval disarmament "was not worth the risk," Lord Jellicoe, famous English admiral, has urged the people to press their government not to have England's naval defenses further reduced.

"Some people have pointed to the Washington conference as the solution of our defenses and to the fact that the world was at peace," he said. "But I personally do not see any sign of it. Some have said that if we would disarm others would, but I do not think it worth while to take that risk."

"Let the defenses be cut down. The cry we hear now is the same old cry we heard after the battle of Tannenberg. The only way we can check the tendency on the part of governments to economize on defenses, because they feel the money is needed for other purposes, is for the people themselves to impress upon the government that they will not have the naval defenses of the empire reduced."

Livestock Marketings

Livestock marketings in Canada during the past year were the best experienced for many years, according to the department of agriculture's report. There were 375,029 cattle, 558,129 sheep, 2,094,291 hogs and 1,565,629 chickens marketed in 1924, as compared with 382,921, 315,422, 2,362,092 and 1,529,250 respectively in the previous year.

In certain parts of England, the heretofore that a holy hen has been bred near a house will protect it from lightning.

Patrol Atlantic For Icebergs

Vessels Equipped With Radio Warn

Iceberg accidents in the North Atlantic now seem to be a thing of the past, indeed even escapes, more or less narrow, appear to be largely incidents of the past. Yet at one time, in the late spring and early summer months, the icebergs, especially in foggy weather, caused mariners to adopt a more cautious course and to move with the utmost caution. Iceberg risks in the lanes of Atlantic travel prompted the establishment of the International Ice Patrol, whose activities have been materially aided by the development of radio. Financed internationally, this valuable service is carried out under agreement by the United States, which provides two vessels operating from Halifax, Nova Scotia, as their headquarters. The United States fleet in the Far Pacific may assist in emphasizing the cordial relations which now exist between the United States and the other nations of the world.

Passed Through Town Bearing His Name

Field Marshal Pleaded That B.C. Town Was Named "Halig"

The Halig special train passed through Halig, B.C. Field Marshal Haig learned for the first time that a town along the transcontinental line of the Canadian Pacific Railway had been named after him.

The field marshal was sitting in his parlor compartment when a large red station bearing the name "Halig" bore into sight. When he leaned forward in his chair and looked at the name he was asked by a Canadian if he did not know that this town had been named after him several years ago.

He said: "No, it is the first I had heard of it," and he looked very pleased.

Countess Haig wrote two letters to their daughters in London to be sent back and posted at Halig as souvenirs.

Tomb Of King David

Is Reported to Have Been Discovered Near Jerusalem

What is believed to be the long sought tomb of King David has been unearthed near Jerusalem by an expedition working under the direction of J. Garstang, according to a dispatch to the London Times.

The Rev. Mr. Duncan, who is working in behalf of the Palestine Exploration Fund, is the excavator of the western side of a buried city, a series of rock chambers in which are believed to be reposes of the tomb of King David. According to the latest report of J. Garstang, dated back to 1900 B.C.

Should Go After Business

"When the Niagara sailed from this port," July 1st, says the Vancouver Sun, "the ship carried approximately 150 American planes for Australia and New Zealand buyers. Why should those planes not have been Canadian planes representing the fruit of Canadian labor and the growth of Canadian industry? The time has come when Canadian industries must get on their feet for the business that lies across the Pacific—Toronto Mail and Empire."

Sherrif—"Little man, you can't win here."

L.M.—"Why, ain't it deep enough?"

Sherrif—"It's not that, but the law does here."

L.M.—"Then I'll have to be content to wade."

BAREE, SON OF KAZAN
James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.
"BAREE, SON OF KAZAN," a Viagraph Picture, With Wolf, the War Dog,
is an Adaptation of This Story

Synopsis
Baroo was a son of Kazan and Gray Wolf, the latter the mother, a full-blooded wolf. Gray Wolf had lost sight in a fight with a Yukon. During the morning time she kept Kazan away from their offspring and it was a great day for Baroo when he discovered his father. He was then eighteen days old. After that he ventured out from the windfall in which he had been, and, finding himself (the sunlight), had his first great adventure.

CHAPTER II.—Continued

In a way Baroo sensed this. He was not afraid of the wolf. He was not afraid of the strange blood-curdling cries they made in the black spruce-forest. But once for a moment he was startled when he saw his mother. That was when one of the wild hunters of the air swooped down on a snowshoe rabbit, and the squealing wailing of the doomed creature set his heart thumping like a little hammer. He felt in those cries the nervousness of that one ever-present tragedy of the wild—death.

"Papa-yushew started it, and with a single wild yelp Baroo went back in a flash, the wolf's back fastened like a red-hot vine in the soft flesh at the end of his nose."

This rabbit was the climax in the first chapter of Baroo's education. It was all that Gray Wolf and Kazan had planned it, all out, so that he might receive his first instruction in the art of killing.

The fact that Ooboomsew, the big snow-eater, had made her nest in the blinding of Gray Wolf had changed here, and a man's club had changed Kazan's. The creek ran close by the stub, which had been driven by the end of his nose."

derstanding of defeat was forming itself swiftly in Baroo's mind, chance saved him. His fangs closed on one of the owl's tender feet. Papa-yushew gave a sudden yelp. The owl was free at last—and with a snarl of triumph Baroo gave a vicious tug at Papa-yushew's leg.

In the excitement of battle he had not heard the rushing tumult of the creek close under them, and over the edge of a rock Papa-yushew and he went together, the chattering water of the rain-swollen stream muffling a final snarl and a final hiss of the two little fighters.

CHAPTER III.

To Papa-yushew, after his first mouthful of water, the stream was almost as soft as the air, for he went sailing down it with the lightning. He was swift, wondering in his slow-thinking big head why he was moving so swiftly and so pleasantly without any effort of his own.

To Baroo it was a different matter. His nose almost like a stone, it might as well have been a wall. It was dark, suffocating, terrible. In the swift current he was twisted over and over. For twenty feet he was under water. Then he rose to the surface and desperately began using his legs.

Suddenly Baroo found himself at the edge of a deep, dark pool in which the water lay still as oil, and his body when he awoke, aching and sore, sprang out from almost under his nose and landed with a tremendous splash in the centre of it. It was Nekki, the Otter.

The otter had not heard Baroo, and in another moment, Papa-yushew, his wife, came sailing out of a patch of reeds, and behind her came three little otters, leaving behind them four shimmering scales in the oily-black water. What happened after that made Baroo wait for a few minutes that he was lost. Nekki had disappeared under the water, and he came up directly under his unsuspecting mate with a force that lifted her half out of the water. Instantly he was gone again, and Papa-yushew took after him feverishly.

It was about three o'clock in the afternoon, and the sun should still have been well up in the sky. But it was growing darker steadily, and the strangeness and fear of it all kept growing, speed, so Baroo's head stopped every little while to listen, and at one of these intervals he heard a sound that drew from him a gasp of awe and joyous whim.

It was a distant, low, wailing, howling, shivering sound of woe. Baroo was not thinking of wolves but of Kazan, and he ran through the gloom of the forest until he was winded. Then he stopped and listened a long time. The wailing did not come again. Instead of it there, called up from the west a deep and thunderous rumble. Through the treetops there flashed a vivid streak of lightning. A moaning whir of wind rode in advance of the storm; the thunder grew nearer; and a second flash of lightning seemed searching Baroo where he stood, shivering under a canopy of great spruce.

At last Baroo could hardly stand, his legs were cramped, every bone in his body seemed out of joint; his ear was stiff where the blood had oozed out of it and hardened, and when he tried to wade into the water he found a sharp little yelp of pain. If such a thing were possible, he looked away where he felt. His hair had dried in muddy patches; he was disoriented from end to end; and where yesterday he had been plump and shiny, he was now as thin and wretched as a misfortune could possibly make him. And he was hungry. He had never known what it meant to be really hungry.

(To be continued)

Explore Lake Winnipeg

A selection of the most interesting stretches of Lake Winnipeg has been completed by Charles F. Goodwin, the yacht captain. Mr. Goodwin, a member of the Royal Canadian Volunteer Reserve, left Winnipeg, May 25, in company with G. Hutt, geologist; L. Clarke and F. Cameron, entomologists; and Professor F. Neave of the zoology department.

Marriage Through Ads

The number of marriage ads in the Berlin newspapers are increasing. Many hundreds of people marry each year as the result of reading advertisements, reports show.

Bought 308 Toads

The backyard of a man at Franklin, Pa., was alive with toads. He advertised that he would pay 10 cents for toads. Boys came by the score and he had to buy 308 toads.

Passport Officer—"Where are your profits that she's your wife?"

Homestead—"I haven't any, but you can prove that she's not my wife you're a made man."

Beaver Strategy

How These Cunning Animals Circumvent Well Laid Plans of Man

Among the most interesting of the smaller mammals, and also typically Canadian, is the beaver, whose intelligent, industry and engineering ability have painted many a moral and adorned many a tale. The latest story illustrating these qualities is told by A. Derville in the American Magazine and makes good reading. Incidentally it may strengthen the sentiment that it would be a waste of time to Canadian wild life were these capable "woodmen," builders and strategists permitted to disappear from our forests and rivers.

The beavers of the Bronx Zoo inhabit a beautiful spot with a lake, where they have a dam and a house that they have built themselves. They work in unison; two cut down a tree and drag it to the dam; two others are engaged in actual construction; and one or more, the blackbeavers or plasterers, dash the clanks with mud. Now the space allocated to them at the zoo is larger, they occupy a whole valley. The only sign of captivity is the fence that surrounds the lake and the fence, the other side of iron stakes and is set in a concrete base embedded deep in the ground, so that the animals cannot dig under it. At the end of the lake grows a large oak tree, near which the fence runs. There, because of the roots of the trees, the massive roots seemed instead of making the beavers from going far underground.

How it crosses those that one weak spot so one knows. It must have taken them weeks to dig their tunnel. Starting at the shore of the lake, they dug to the roots of the tree and then through them, thereby dodging the concrete. The tunnel came to the lake, the other side of the fence, and the animals escaped but one, and therein perhaps lies the supreme mystery of the whole incident. Why did they leave him? One thing is certain. By staying behind he concealed the escape of the others. Beavers seldom appear all at once; the workers would use this one and think the others were nearby. Moreover, he made many tracks in the mud and set a good deal of the corn which they ate.

The keepers knew nothing about the escape until reports came in from the mounted game, a mile away, that the beavers were cutting down valuable trees. Then they discovered that only one beaver was left—and he had been left as a blind.

Horse Sense Saves Them

A writer in Forbes Magazine reveals the somewhat surprising fact that there are more horses in this country by several millions than there are motor-driven vehicles. The horse is not seen often, as his horse sense keeps him off city streets—Detroit Free Press.

TIED OUT ALL THE TIME
Nerves Gave Little Rest

Relieved by Lydia E. Pinkham's Vegetable Compound

Harrosworth, Ontario—"I took your medicine before my baby was born and I am doing what I can to publish this as a testimonial. I was very poorly until I started to take it. I just felt as though I was tired all the time and would take weak, faint spells. My nerves would bother me until I could get little rest, day or night. I was told by a friend to take Lydia E. Pinkham's Vegetable Compound, and it helped me wonderfully. I would recommend it to any woman. I am doing what I can to publish this good medicine. I find that little book you sent me to any one can help. I am with the greatest of pleasure say my name in regard to the Vegetable Compound if it will serve to help others."

Harrosworth, Ontario, R. No. 2.

In a recent canvass of purchasers of Lydia E. Pinkham's Vegetable Compound over 100,000 replies were received and 98 out of every 100 said they had been helped by its use. This medicine is for sale by all druggists.

Russian Peasants Are Superstitious

Believed Property Was Damaged As Penalty For Sin

An amazing trial illustrating the ignorance and superstition of the Russian peasantry recently was told in the Minsk district. In order to increase the income of the village priest and to strengthen his authority over the local peasantry a group of village parishioners resolved to frighten the peasantry with the pretence of a "frighten them" in the village.

A village boy was dressed up to resemble a devil. During the night he went to the village dwellers a "frighten them." He was instructed to carry out secretly slight damages to peasants' property. This went on for several months, and the ignorant peasants took it all in earnest, as a penalty for their sins. They flocked to the church, induced the priest to add special services and organized common prayers and religious processions.

A special commission had to be sent to the district town to investigate the peasants' troubles, which were brought to an end only by the arrest of the "devil." The priest and the local authorities were placed on trial and sentenced to many years imprisonment.

Indian Potentate Likes Golf

Says Low Score Gives Bigger Thrill Than Shooting Elephants

A royal highland potentate with gold sport shoes is going to chase a little white ball with various sticks on cross-country walks through fairways, jungle rough, desert-like and traps and velvet greens in Canada and the United States. The Zaminadar of Palayamattil and Paladanattal—lake it from the passenger list—came to New York on the Aquitania recently. "You Americans come to India to shoot tigers in our jungles," he remarked. "I come to America to shoot golf in your country." He added that there was a bigger thrill in making a lower score on the links than in shooting an elephant.

He is going to Chicago and San Francisco and return to New York by way of Canada on the way home, and on the journey he will play his favorite game as much as he can.

It testifies for itself—Dr. Thomas' Elettrolite Oil needs no testimonial at all. It is the best remedy for all kinds of fever, for all kinds of colds, for all kinds of burns, for all kinds of skin diseases, for all kinds of rheumatism, for all kinds of neuralgia, for all kinds of headache, for all kinds of indigestion, for all kinds of constipation, for all kinds of flatulence, for all kinds of colic, for all kinds of cholera, for all kinds of dysentery, for all kinds of diarrhea, for all kinds of hemorrhage, for all kinds of leucorrhoea, for all kinds of menorrhagia, for all kinds of metrorrhagia, for all kinds of amenorrhoea, for all kinds of dysmenorrhoea, for all kinds of menometrorrhagia, for all kinds of leukometrorrhagia, for all kinds of hemimetrorrhagia, for all kinds of dyspareunia, for all kinds of vaginitis, for all kinds of colpitis, for all kinds of cervicitis, for all kinds of endometritis, for all kinds of parametritis, for all kinds of salpingitis, for all kinds of oophoritis, for all kinds of metritis, for all kinds of pyometritis, for all kinds of leukometritis, for all kinds of hemimetritis, for all kinds of dyspareunia, for all kinds of vaginitis, for all kinds of colpitis, for all kinds of cervicitis, for all kinds of endometritis, for all kinds of parametritis, for all kinds of salpingitis, for all kinds of oophoritis, for all kinds of metritis, for all kinds of pyometritis, for all kinds of leukometritis, for all kinds of hemimetritis, for all kinds of dyspareunia, for all kinds of vaginitis, for all kinds of colpitis, for all kinds of cervicitis, for all kinds of endometritis, for all kinds of parametritis, for all kinds of salpingitis, for all kinds of oophoritis, for all kinds of metritis, for all kinds of pyometritis, for all kinds of leukometritis, for all kinds of hemimetritis, for all kinds of dyspareunia, for all kinds of vaginitis, for all kinds of colpitis, for all kinds of cervicitis, for all kinds of endometritis, for all kinds of parametritis, for all kinds of salpingitis, for all kinds of oophoritis, for all kinds of metritis, for all kinds of pyometritis, for all kinds of leukometritis, for all kinds of hemimetritis, for all kinds of dyspareunia, for all kinds of vaginitis, for all kinds of colpitis, for all kinds of cervicitis, for all kinds of endometritis, for all kinds of parametritis, for all kinds of salpingitis, for all kinds of oophoritis, for all kinds of metritis, for About Town and Country

A new serial commenced in last issue "Baree, son of Kazan" by James Oliver Curwood. The story is a love epic of the far north.

James W. Wallis, O.D., Optometrist and Eyesight Specialist, (of Calgary) will be at Alberta Hotel, Oyen, on Friday, August 7.

Mrs. W. V. Miller and children are spending a few days in the country visiting Mrs. A. C. Robinson.

Mrs. W. B. Dobbin and children are visiting in Calgary.

Mr. and Mrs. W. J. Miller and children of Kipling, Sask., who are spending their summer vacation, are spending a couple of days in town. They are the guests of Mr. and Mrs. J. J. Kelly.

Mrs. Grace McIntosh of Calgary, who arrived in Oyen yesterday, is visiting her sister Mrs. J. J. Kelly.

Mr. and Mrs. E. B. Brundage are visiting in the district.

Cutting started in this district last Friday and will be general next week. While the average yield has been cut down there are a number of fine crops in the district.

Charles D. McMillan and children returned last Saturday from Banff where they spent a vacation. Mrs. McMillan who remained at Banff is expected home shortly.

Mr. and Mrs. S. A. Miller and son and Mrs. W. H. Peterson, motored to Calgary on Sunday for a short visit.

Archib Johnston left for Calgary on Sunday on a business visit.

Mrs. Charles Stewart and son are visiting Mr. and Mrs. Robert McCullum of Sunnydale.

Miss Louise Charbonneau is spending a two-weeks vacation with her parents.

Mrs. E. N. Charbonneau, who has been visiting in Winnipeg, returned to Oyen yesterday.

Mrs. Zeal who arrived in town on Monday from Drumheller is staying at the home of Mr. and Mrs. W. D. Guthrie.

H. R. McMurtry was painfully injured last Saturday while unloading a crate plane from a box car to his dry. He sustained a twisted knee and ankle by being crushed under one end of the crate. He is now able to get around with the aid of crutches.

H. R. McMurtry, Wes Horne and Paul Ouzt played ball at Buffalo last Thursday and participated in the first money.

Edward Ihde, 11 year old son of Mr. and Mrs. J. C. Ihde, returned to his home this week after receiving treatment for a broken shoulder.

Gordon Caswell who has been farming this summer returned to Oyen yesterday to take charge of the Grain Growers Elevator.

SIBBALD ITEMS

Mr. and Mrs. H. S. Fizer have returned from Calgary district for the harvest season.

A. V. Youell left for Saskatoon to join his family on their holidays.

Mr. Lovitt, former school teacher here and his wife, were visitors in Sibbald last week.

A very enjoyable Sunday picnic was held at Glover's Lake on July 30, in charge of the Ladies Aid of the Union Church. There was a good attendance, and all enjoyed the games and children's races. Supper was served on a long table spread on the grass.

Mrs. George Hetherington and Mrs. Mulligan, from Millbrook, Ontario, spent a few days last week at the Walker home, after which they motored to Coronation, in company with Miss Ruth Walker and J. D. Hetherington, to visit Mr. and Mrs. A. Hetherington.

Make MORE Money with CASE Machinery

Your Best Investment

Your best investment is the one that makes you the most certain return. With a Case Steel Thresher you have two chances to increase your income—not only this year, but for many years to come.

You can thresh your own grain better and when in the best of condition—and you can make money doing the same good work for the neighbors.

Efficient—Case machines are noted for their fast, clean threshing of all crops.

Thrashes All Grains and Seeds—From peanuts and beans to the finest grass seed.

Built of Steel—A strong steel frame holds bearings in line and prevents warping and twisting. Steel covering and steel construction contribute to great strength.

Threshing with your own machine is profitable. An investment in a Case Machine makes this profit larger and more certain. If you want to make more money at farming come in and get facts and figures about Case threshers.
